

Series 1 Micro-Fill

The All-Fill Series 1 Micro-Fill is designed for the precision dosing of powders and granules either by volume or by weight. The servo-controlled auger and touch-screen display make the machine extremely flexible and simple to operate.

The Micro-Fill unit can be supplied free-standing, with a purpose-built workstation for laboratory/pre-production use, or with a container handling package for fully automatic productions. Multi-head configurations are also available where close auger centres are required.

Standard Features

- ▼ Compact bench-top design
- ▼ Fill weights from 10mg to 100g
- ▼ All stainless-steel contact parts
- ▼ No-tools removable change parts
