History

The origins of the Giuseppe Desirò SRL date back to 1860, with the production of cars for tramways, transformed at the end of the century in that of presses for straw hats and felt and converted again in the 50s in the production of machines for the manufacture of caps crown and aluminum caps.

The subsequent advent of plastics and the consequent revolution in the packaging industry in general, has led the Giuseppe Desirò to start in parallel with a new, modern and diverse design and manufacture of machinery for the assembly of plastic products for the sectors food, cosmetics, chemical, pharmaceutical and products for the home.

Development and reliability

The experience gained over the years is combined with a constant technical update in order to create a product that embodies the tradition of craftsmanship and the typical Tuscan genius, joined the high electronics and information technology.

Behind each automatic Giuseppe Desirò machine exists the work of an entire company that, starting from the design phase, implemented through the use of the most modern CAD technology, transforms the idea in the drawing, the following in the realization and development with a particular attention paid to details, the continuous efforts to offer customized responses to different needs.

A study and a concrete work that meets the demands of a constantly evolving market shaping high precision and reliability machines.

Customization and care used in the design and construction of machinery Giuseppe Desirò guarantee the high reliability of the final product.

Speed and safety, thanks to an accurate computer control that follows each sequence of work of the machine allow to realize a high-level production with rapidity and warranty.

Present

The Desirò Giuseppe SRL has extensive experience in the design and manufacture of automatic machines for aluminum capsules Pilfer-Proof type and similar and for the assembly of plastic products for complex closing proving requirements of the food, pharmaceutical, cosmetics and products for the home.

The machines are fully automatic with total control of the assembly process.

Moreover, Desirò can study and implement new solutions and special machines on customer request.

Some of the most significant achievements were machines for the assembly of stick deodorant, capsules with lever, child-proof closures, vaginal cannulas, banding for spoons, inhalers, dispensers, liquid soap dispensers, pharmaceutical capsules, and other types of closures.
