

## → WRA-PAL SPILOTE BASIC/CLASSIC

### ERGONOMICS, SAFETY, PERFORMANCES

European leader in overwrapping film systems, Thimon is the only manufacturer to master every packaging technology, with techniques patented and widely referenced abroad over 40 years.

Among all processes, the stretch wrapping is the most economical on the market. Very flexible, it adapts efficiently to every type of pallets.

The WRA-PAL SPILOTE BASIC or CLASSIC – wrapping machine with rotating arm – takes great care of the load, preserving it from any movements during the wrapping cycle.

## STRETCH WRAPPING WITH ROTATING ARM: OPTIMIZED COST

→ **Respect of the product**

→ A protection adapted and guaranteed by a double control of the pre-stretch film and its lay-on force on the most delicate loads.

→ **Resistance**

→ A perfect cohesion product/pallet thanks to a film pleating system at the bottom of the pallet.

→ **Adaptability**

→ Machine capable of adjusting position and number of wrapping turns according to the product nature, whatever the dimensions are (width, length or height).

→ **Cost**

→ The best purchase value on the market for the machine and the film.

→ **WRA-PAL SPILOTE BASIC/CLASSIC: the automatic**

→ **Optimized ergonomics for operation and maintenance**

→ "OS Vision" touch screen terminal easy to use,  
→ easy setting system for numbers of wrapping turns and overlap rate.

→ **Respect of the load and product**

→ rotation of the arm rather than the load to preserve its stability,  
→ process of lay-on force control adjustable to any kind of load to optimize the cohesion,  
→ sealing system highly resistant on counter jaw, without damaging the load,  
→ sealing without trailing edge of film.

→ **Strength and wrapping quality guarantee**

→ very high stretching capacity coupled with simple loading of the film,  
→ pleating system at the bottom of the load.

→ **Dust or waterproof ensured**

→ possibility of putting a top sheet upstream or integrated in the machine, by using a Top-Pal.

→ **Maximum saving**

→ motorized pre stretching of the film.

→ Easy film way

→ Sealing very resistant

→ Tactile screen

→ Film pleating at bottom of pallet

THE TEST CENTRE  
TRAINING & RESEARCH

A TOOL AVAILABLE FOR:

- **optimizing our equipment** by testing our solutions on your products beforehand,
- **enhancing our solutions**, optimizing the pertinence of the coupling film/machine,
- **training** at any time on the WRA-PAL SPILOTE BASIC/CLASSIC,
- **developing new options and solutions** and evolving along with your requirements.

For any adaptation of equipment, lay-out and dimensions, please contact us.
