

## CHUB PACKAGING FOR CHEMICAL EMULSIONS

### HIGH SPEED PRODUCTION WITH LOW PACKAGE COST

The KartridgPak CHX-160 produces low cost chub packages in diameters up to 4.25" [108mm] and at speeds up to 160 packages per minute.

The proven, continuous motion design of the KartridgPak CHX-160 provides high speed, reliable production, while the stainless steel and anodized/plated metal construction provides unmatched durability and life, even in harsh environments.

### MARKETS

Mining

### APPLICATIONS

- Emulsions
- Water Gels

# KartridgPak<sup>®</sup> CHX-160

## BENEFITS OF USING THE R.A JONES KARTRIDGPAK CHX-160

---

### Lower package costs

- Utilizes roll stock wire vs. pre-formed clips
  - Utilizes roll stock film
  - In-line clip-forming and application reduces clip cost
- 

### Decreased downtime

- Continuous motion design
  - High operating efficiency
  - Optional - Quick change sizing parts
- 

### Production flexibility

- Production speeds up to 160-ppm (with M23 short-stroke option)
  - Small footprint
- 

### Product flexibility

- Diameters from .62 - 4.25" (15.9 - 108mm) with change parts
  - Lengths from 4 - 12" (101.6 - 304.8mm); up to 144" (3658mm) available with optional clutch-brake
- 

### Reduced product waste

- Vertical, gravity product feed design produces consistent package lengths
- 

## PRODUCT FEATURES

- Continuous motion design
- In-line clip-forming and application
- Roll stock film
- Stainless steel and anodized aluminum construction
- Allen-Bradley PLC controls & operator interface
- Extrusion sealing technology

## OPTIONS

- M23 short-stroke clipping system
- Clutch-brake
- Film registration
- Enclosed heat seal
- Quick-change sizing parts

### Machine size:

84"W x 53"D x 92.5"H (Ø4.12" max. pkg.)

91"W x 64"D x 113"H (Ø6.00" max. pkg.)
